

## Press Release

# Mobilegov opens an office in the 'UK Silicon Valley'

Nice – Sophia Antipolis (France), November 2007

French security software editor Mobilegov launches its UK presence this autumn in Reading at the heart of the Thames Valley following several months of market research and supported by the Thames Valley Economic Partnership (TVEP), South East England Development Agency (SEEDA) and UK Trade & Investment (UKTI) in Paris.

### A strategic location

Mobilegov is a French company developing original and patented software to protect companies and organisations against the threat from the use of unauthorised equipment (PDAs, Smartphones, USB sticks, external and internal drives etc.). At this stage the company has two main solution offerings, Device Authenticator which protects networks against the use of unwanted removable media devices and Device Linker which allows the use of USB sticks only on authorised configurations.

Mobilegov is a global player in Data Loss Prevention helping companies to protect their main asset - their data.

Mobilegov has opened an office in GreenPark, Reading next to companies such as Cisco, Symantec and LogicaCMG.

President Michel Frenkiel and CEO François-Pierre Le Page has spent much time searching for the ideal location for their UK centre.

“As a leading patented technology owner, we were very strongly encouraged by SEEDA and TVEP to setup in the UK. The fact that Sophia Antipolis, where we have our Head Office, has many similarities with the Thames Valley (Large ICT Community) made our choice easier. We have built a fantastic link between local Government agencies and, at the same time, it is crucial for the development of our network to stay close to our resellers and partners”

Mobilegov has built a significant and impressive network of partners in Europe and starts its operations in the UK with LogicaCMG. The company is supported by the French Government and its solutions are used by organisations within diverse markets such as Military & Defence, Nuclear and Energy, Universities and R&D centres.

Ben Churchill, TVEP's Inward Investment Manager said “We are delighted to welcome Mobilegov to the Thames Valley, where it can enjoy the company of some of the world's leading IT companies and join a business community that strongly supports and encourages innovation. MobileGov is ideally placed to develop its position as a technology leader and to engage with new partners and customers in the UK”.

Laetitia Régnault, SEEDA's Director of Business Development in France said that “Mobilegov's dynamism and confidence to expand into new markets made our job of supporting them by creating introductions and helping build key relationships a pleasure and contributed greatly to their successful arrival in the UK”.

**About Mobilegov:** Mobilegov is a French security software editor providing hardware identification solutions, device access management solutions and USB storage devices having the capacity to recognise the configurations they are connected to. All the Mobilegov solutions are patented. The solutions are distributed by a network of international resellers and Integrators and protect companies and organisations of any size. Mobilegov is a private company, founded in 2004 with its head office in Sophia Antipolis, the French Technopole.
